

 **BORA**

BORA Classic 2.0

# BORA Classic 2.0 highlights

## **Minimum volume**

Thanks to the quiet fan, the extractor remains barely audible even at high power levels.

## **Intuitive sControl+ operating panel**

The unique operating panel is simpler than ever: it works intuitively with a swipe of your index finger up or down. All important functions can be accessed with a single touch.

## **Minimalist design**

The cooktop and extractor are ideal for flush installation. Their perfect lines allow them to blend in discreetly and elegantly with any modern kitchen design.

## **Oversized 4 24 cooking surface**

Thanks to the central operating panel by the extractor, no space is taken up by controls on the cooktop, and there is room to cook with four pots measuring up to 24 cm at the same time.

## **Oversized surface induction cooking zones**

Particularly large surface induction cooking zones enable you to consistently warm even very large pots or roasters through.

# BORA Classic 2.0 highlights

## **Modular system**

You have the flexibility to choose which combination of cooktops you want, from surface induction and gas cooktops to a Tepan stainless steel grill.

## **Accurate temperature control**

The Tepan stainless steel grill heats up to 250°C in under five minutes and offers ultra-precise temperature control.

## **Automatic extractor control**

The extractor power level automatically adjusts itself according to current cooking conditions, so there's no need for manual adjustment.

## **Simple cleaning**

All parts that come into contact with cooking vapours can be easily removed through the inlet opening and put in your dishwasher for fuss-free cleaning.

## **Integrated drip tray**

If anything is spilt during cooking, the integrated drip tray safely catches both solids and liquids.

# Unlimited freedom.

Maximum individuality for a unique cooking experience: the BORA Classic 2.0 has got you covered. Whether it's gas, induction, glass ceramic, Tepan grill or a mix, our state-of-the-art system means you can choose which cooktops and extractor systems to combine, meeting your kitchen requirements exactly.
